Subject: Re: Air District HRA AB&I May 7th Public Workshop

Hi Jeff,

Thank you for the invitation. Scott Connolly and I plan to attend next Friday. It may be helpful to have a pre-meeting next Tuesday or Wednesday to discuss our participation at the meeting, so we can prepare accordingly.

Thanks,
Roshni

Dear Roshni,

The Bay Area Air Quality Management District (Air District) is formally requesting that the USEPA participate in our May 7th, 2021 workshop regarding the AB&I Foundry (AB&I) in East Oakland, California. East Oakland is a community of color located within our jurisdiction that suffers from disproportionate impacts due to air pollution. Details regarding the meeting are contained in the link below:

<https://www.baaqmd.gov/Publications/Engineering/2021/A-B-and-I-HRA-Workshop-040821>

The Air District will be presenting the results of a recent health risk assessment performed on AB&I as part of its ongoing efforts to reduce emissions from stationary sources of toxic air pollution. We will also be discussing next steps to reduce emission from this facility. The Air District expects that members of the public, local elected officials, AB&I workers, other local industries, members of city, County and State governments will attend and that members of the community may have questions for attendees.

The Air District is hoping USEPA can identify a participant to would be available for questions from the public, if necessary and our staff would identify that person as being present at the beginning of the meeting.

*Best Regards,
Jeff*
